N. 1 1 Gennaio 1985

pag.

1 A. O. Barut – Mass formula for Z^0 and other predictions.

3 M. Nishioka – On the behaviour of Weyl's gauge field.

7 L. Gardini, R. Lupini and C. Pellacani – Transition to chaos in a three-mode model of forced, dissipative flow in a rotating fluid.

13 W. Alles – Constraints on quark masses from nucleon stability for scalar meson exchange.

17 R. Fonte and A. Insolia – Lower-l cut-off in heavy-ion fusion process.

21 S. Tinti and F. Mulargia – An improved method for the analysis of the completeness of a seismic catalogue.

28 J. Proriol – Exact Glauber calculation of the ^{4}He-^{4}He elastic scattering at ISR energy with a non-Gaussian $\mathcal{N}\mathcal{N}$ interaction.

32 S. Marchetti and R. Simili – Simple efficient c.w. TE, FR, CO_2 laser with large cross-section.

35 G. Ziino – On a further argument in support to the conjecture of a three-dimensional time.

39 S. Fajfer and K. Suruliz – A note on deep inelastic scattering in the quark-confining potential models.

45 R. S. Brusa, S. Oss and A. Dupasquier – Effect of motional magnetic fields on positroniumlike systems in polar media.

N. 2 16 Gennaio 1985

pag.

49 E. Di Salvo – Remarks on rainbow scattering in nuclear physics.

54 I. Bediaga, E. Predazzi, A. F. S. Santoro, M. G. Souza and J. Tiomno – Vector meson and axial-vector diquark decay constants.

59 P. P. Delsanto, L. C. Biedenharn and M. Damos – Interaction of quasi-closed channels with open-channel continua.

63 S. Cecotti – A trick for the computation of some non-Gaussian path integrals.

67 M. Carmeli – Fast rotating particles: the electron magnetic moment.

70 E. R. Caianiello and G. Landi – Maximal acceleration and Sakharov's limiting temperature.

73 F. Mulargia, P. Baldi, V. Achilli and F. Broccio – On the feasibility of a seismic gap in southeastern Sicily.

80 M. Nishioka – An analogy between general relativity and symmetric gauge field.

83 A. D. Jannussis, L. C. Papaloucas, P. I. Tisilimigras and N. R. C. Democritos – Construction of the density matrix in the Lie-admissible formulation.

89 W.-H. Steeb and A. Kunick – Instability of trajectories of a class of Hamiltonian systems.
92 I. Bediaga, E. Predazzi, A. F. S. Santoro, M. G. Souza and J. Tiomno – Λ_c^+ lifetime in a quark-diquark scheme.

N. 3 1 Febbraio 1985

pag.

97 G. Guidarelli – Multichannel infinite clipping as a form of sampling of speech signals.
106 F. Calogero – Interpolation and differentiation for periodic functions.
111 T. Kobayashi – Hydrogen-like bound states of lepton–heavy-meson systems in composite model for leptons.
117 R. Jones – Particle injection for magnetoelectrostatic confinement.
123 L. Bracci and G. Fiorentini – Magnetic monopoles in stellar interiors.
129 A. Jannussis – Difference equations in the Lie-admissible formulation.
134 S. Bottini – Some coincidences concerning the electron occupancy numbers of atom subshells.
137 Y. N. Srivastava, A. Widom and M. H. Friedman – Engineering the chiral anomaly: the quantum Hall effect.
141 A. M. Jayannavar – A note on macroscopic quantum tunnelling with dissipation.

N. 4 16 Febbraio 1985

pag.

145 P. Lu and P. Suebka – On the calculated cross-sections of fusion reaction.
149 S. Iwao – Inequalities among total binding energies for ordinary nuclei and hypernuclei.
153 M. Surdin – EPR, ZPF and SED.
157 V. Aquilanti and G. Grossi – Discrete representations by artificial quantization in the quantum mechanics of anisotropic interactions.
163 G. Dattoli, J. Gallardo and A. Torre – The spherical Raman-Nath equation with time-dependent coefficients.
167 G. Dattoli, A. Dipace and R. Mignani – SU_N coherence vector and free-electron laser dynamics.
171 F. T. Vertosick jr. – The metric of space-time and the weak interactions: a brief note.
175 P. E. Gordon and N. M. Chase – Photon states and spontaneous emission.
179 W. Malfliet and L. Van de Velde – A study of two interacting KdV-solitons.
184 Feyzullah Yazici – Temperatures of the fragment spectra in high-energy proton-nucleus collisions.
187 W. Kummer, G. Wirthumer and H. Leutwyler – Explicitly translation invariant prescription for the contributions of the gluon condensate.
192 S. L. Lou – Magnetic monopole in five-dimensional Kaluza-Klein theory.
195 J.-P. Lebrun – Stationary transverse dipolar magnetostatic distributions for a nonlocal radiation field and energy functional for such model.
199 Daya Shankar Kulshreshtha – The $c\bar{c}$ and $b\bar{b}$ spectroscopy in the two-step potential model.
204 S. Carusotto, E. Iacopini, F. Scuri and G. Stefanini – Atom size of rare gases from their magnetic birefringence.

N. 5 1 Marzo 1985

pag.

209 H. V. von Geramb, K. Nakano and L. Rikus – Microscopic analysis of antiproton scattering from carbon.

215 D. Papadopoulos and J. L. Sanz – New inhomogeneous viscous-fluid cosmologies.

221 L. A. Labarga and J. L. Sánchez-Gómez – Nuclear effects in proton decay: relativistic treatment.

225 S. D. P. Vlassopulos – Gluino fragmentation in high-p_T hadron production.

232 Y. N. Srivastava, M. H. Friedman and A. Widom – Planer dynamics of charged quantum vortices.

235 M. Banai and B. Lukács – An unconventional canonical quantization of local field theories.

241 D. D. Holm, S. F. Johnson and K. E. Lonngren – Structure of shock implosion in a plasma.

248 G. T. Condo – Multinucleon absorption of slow antiprotons in complex nuclei.

252 J. Seke – The influence of the counter-rotating terms on the superradiant emission (Errata and Addendum).

N. 6 16 Marzo 1985

pag.

257 C. Daskaloyannis, M. Grypeos, C. Koutroulos and D. Saloupis – The Woods-Saxon Λ-nucleus potential and the phenomenological estimate of the Λ-well depth.

263 E. Kapuścik – Generalized Helmholtz theorem and gauge invariance of classical field theories.

267 S. R. Choudhury and G. C. Joshi – Charged lepton masses as electromagnetic self-energies.

270 C. I. Staicu – Fermat's last theorem and general dimensional analysis.

273 K. Hajra – Binding energy of a Λ-particle in nuclear matter.

279 M. Bartuccelli, P. Carbonaro and V. Muto – Kadomtsev-Petviashvili-Burgers for shallow-water waves.

285 N. Cufaro Petroni, C. Dewdney, P. Holland, A. Kyprianidis and J. P. Vigier – Causal space-time paths of individual distinguishable particle motions in N-body quantum systems: elimination of negative probabilities.

295 C. Baffioni, G. Careri and A. Giansanti – Leaf tissue desiccation process: a dielectric-gravimetric study.

299 H. Minowa and N. Mishima – On time delay in the S-wave scattering.

305 R. Jones – Surface barrier confinement of plasmas.

309 D. Lorentz-Petzold – Nontrivial anisotropic supergravity cosmological solution.

313 A. Jannussis and K. Tsoulias – Coherent states of the R-inherent quantum oscillator in the p-representation.

N. 7 1 Aprile 1985

pag.

321 V. V. Alexeenko and G. Navarra – Possible contribution of primary gamma-rays to the observed cosmic-ray anisotropy.

325 D. Bedford and F. Selleri – On Popper's new EPR-experiment.

329 K. Sasaki – Instanton effects on the O_3 Heisenberg model in two dimensions.

335 G. Nardulli – Long-distance contributions to the parity-violating pion-nucleon coupling.
341 M. Orlowski – New nucleon-nucleon potential model.
347 A. D'Onofrio, H. Dumont, B. Delaunay, J. Delaunay, A. Brondi, R. Moro, M. Romano, F. Terrasi, S. Cavallaro, L. Sperduto and M. G. Saint-Laurent – Reaction mechanism study for the system: $^{20}Ne+^{60}Ni$ at 44 MeV/A.
352 Rue-Ron Hsu and Wai Bong Yeung – Solution for the five-dimensional general relativity that simulates a charged macroscopic object in four dimensions.
357 R. Jones – Magnetoelectrostatic confinement in RSX-I.
362 N. Cufaro Petroni, P. Gueret, A. Kyprianidis and J. P. Vigier – An alternative derivation of the spin-dependent quantum potential.
365 J. M. Domingos and M. H. Caldeira – A remark on the proof of self-adjointness of L_x, L_y and L_z.
367 R. Bergamini and R. Capovilla – Cosmological models in Kaluza-Klein theories.
371 H. Stremnitzer – Composite scalar contributions to the anomalous magnetic moments.
376 M. P. Silverman – On the use of multiple-valued wave functions in the analysis of the Aharonov-Bohm effect.
379 I. L. Buchbinder and S. D. Odintsov – Asymptotical conformal invariance in curved space-time.
383 C. Delfino Galles – A conformal gauge for the spin-2 field.

N. 8 16 Aprile 1985

pag.

385 M. Ottaviani – Larmor radius expansion for the warm-plasma dielectric tensor.
391 P. Bandyopadhyay and B. Basu – Random fields, Ising model and boson-fermion phase transition.
397 A. Grauel – Nonlinear wave equation of KdV-type, integrability and solutions.
403 J. Linsley – Proton-proton total cross-section at $E_{c.m.} = 15$ to 150 TeV from cosmic-ray data.
411 R. A. Buchl – Polynomial generating functions in two-body elastic scattering.
415 T. Chmaj and K. J. Heller – Nuclear effects in Drell-Yan processes.
421 R. Jones – A magnetically guarded dipole limiter.
425 W. Augustyniak, L. Głowacka, M. Jaskoła, J. Turkiewicz, L. Zemło J. Dalmas, E. Gadioli and E. Gadioli Erba – Structure effects in (n, α) reactions on Nd isotopes.
430 R. Malcor – From special relativity to quantum mechanics through interval and phase.
435 R. Malcor – On the spatio-temporal extension of elementary particles.
438 G. Tarozzi – Experimental tests of the properties of the quantum-mechanical wave function.
443 A. Bach – On the fluctuation of black-body radiation.
447 T. Kobayashi – A fermion mass relation and prediction of the top-quark mass in a composite quark-lepton model (Erratum).
448 G. Ziino – On a further argument in support to the conjecture of a three-dimensional time (Erratum).
